NEW NATION FORMED

NATION OF SERENTHIA ON RIVER THAL

A New Nation has been formed! RiSK, otherwise known as RageAndGrace, has, after the scandal (Page 2) that has recently affected them, has gracefully retired from life in the Thalizar Empire to form their own nation, the Kingdom of Serenthia. The Kingdom is on the River Thal, between Thalizar and Nordia on the northern side (It will not cause any disruption on the southern side of the river). It is expected to build a capital city along the river, (work on which has already begun with the *Cathedral of Serenity*) and expand into the hinterland of the territory (ending near the old UN), with further dwellings and farming areas.

ELECTION FOR GOVENOR OF LUXURIA

Luxuria has a tumultuous history. It began as part of the wider Thalizar Empire, before being being declared independent in December 2023, forming its own Military, National Anthem, and even religion (The Church of Corona). As a self-proclaimed "Capitalist State", Luxuria traded with all nations great and small, and did not hesitate to stand up to other countries it thought to be the agressor. After the tragic passing of their leader, ErezDaBerez, the country fell into gradual disrepair, and has been largely vacated. During the recent conflict, the territory was annexed by our glorious empire, and we are now holding to first national elections to decide who will locally lead it.

OTHER NEWS

Server Scandal

World Corrupted!

Early on the 21'st of November, seasoned Terrorist RiSK perilously broke into the server console and deleted the entire world, the lifeblood of our civilisation. The admins were confused, and assumed that the server hosting company were at fault. After several hours, the server's world was backed up to the world of six weeks earlier. However, around a day later, the criminal struck again, this time, deleting every single file on the server, including all plugin data. The world again was restored, and the criminal publicly admitted their guilt. There is an ongoing investigation into the cause for these heinous deeds.

Thalizar Harbour Corrupted

Civitas Dam Contruction

After months of agonising wait, construction (upset by the deleted world), has finally commenced on the Civitas Dam in Rextonville. The dam is going to have the capability to travel up and down it to the upper lake, and down to the river Thal. It is expected to be under construction for several further weeks, and also to power a hydroelectric station that powers lighting for the entirety of our capital and local industrial airport (including the airport). It is being constructed by the newly formed Builders Guild.
